History: This message has been forwarded.

Dear Region 9 Air Monitoring Managers,

EPA Region 9 has developed and is providing an update to the Annual Network Plan memorandum that first went out in 2007. The new memo includes clarifications to pre-existing plan elements in an effort to promote consistent and thorough plans and also provides updated information reflecting changes in regulation since 2007. The complete memo, along with its attachments, are included in the pdf file titled "FINAL 2012 Network Plan Memo+attachments (pdf version)". In addition, we are also providing three word file document versions of attachments A, B, and C of the memo to allow for simplified use of the suggested formats.

We recognize that this memo is being sent only a couple months before plans are due, and that many of you have already produced plans for internal review and public notice and comment. We understand that the timing of this memo may make it difficult to implement changes to this year's plan. As in past years, we will work with agencies on a case-by-case basis to insure that the network plan requirements continue to be met.

We thank you for the time and attention paid each year when you develop these documents. As always, should you have any questions, please feel free to contact me or anyone from my monitoring staff.

Matt
